EDUCATION

BSc. (HONOURS') in Computer Science (UGC) NSBM University
2020-2024 (Completed)
CGPA: 3.32 (SECOND CLASS UPPER DIVISION)

GCE (A/L) Examination 2019 –Biology Stream Mahanama College, Colombo
Passed with C S S

TECHNICAL SKILLS

- Java, C, JavaScript, PHP
- ReactJS
- MySQL, MongoDB
- Git
- Flutter, Dart, Material UI
- Project Management-figma
- VS Code, Android Studio
- Firebase

CORE COMPETENCIES

Team work , Problem Solving , Leadership , Adaptability , Presentation skills , Management , Self Learning

PROJECTS & EXPERIENCE

Crime Reporting & Evidence Management System (Final year project)

- Developed a application for crime reporting, improve digital evidence management, and strengthen public involvement in investigations. It integrates GIS mapping for tracking incidents, a digital evidence submission platform, and analytics for law enforcement decision-making through a crime prediction model.
- Technologies: HTML | TAILWIND CSS | JAVASCRIPT | PHP | MY SQL | Google Maps | Python | Google Colab

LEARN ASCENT (MOBILE APPLICATION)

Academic Group Project to Facilitate Mobile Learning Management System. (LMS)

- Technologies: FLUTTER | DART | FIREBASE | MATERIAL UI

Dose Diary Medicine management system

An application designed to handle the operations of the medicine stock at the Noble Aged Nursing Care Home which is built by React framework integrated with NodeJS and MSSQL Server.

- Academic group project
- Technologies: React Js | Tailwind CSS | Material UI | Node JS | MS SQL server | Rest API | WindUI Components

Life Below Water- Awareness Website

- Life below water website is created based on UN SDG goals, processes such as donating, volunteering and showcasing resources for the marine life conservancy.
- Technologies: HTML | CSS | JAVASCRIPT | PHP

Flight Management System

Phoenix Airline System is a web application with a small online flight booking system. Processes such as user management, flight management, and ticket management. And also used frameworks such as React on this project

- Role: Full-stack development
- Technologies: REACT JS | TAILWIND CSS | HTML | JAVA

WORK EXPERIENCE

- Intern Software Engineer at EXE.lk (04th of April 2024 - 13th of November 2024)

NestJS for API development and backend services | ReactJS for building dynamic user interfaces | Firebase for backend services and real-time database management | MySQL for database design and optimization | Java for application development | Machine Learning for AI model development and dataset creation

ACHIEVEMENTS

Won 2nd place in Arduinothon 1.0 (2022), Completed Industry preparation training programme (2023)

ROLES & RESPONSIBILITIES

- Member of Leo organization in NSBM
- Volunteer in Foss community in NSBM
- Member of IEEE student branch of NSBM
